good

I really enjoyed the class i just think that 3 minutes per quiz question is to much what you should do is have all of the questions on one slide and then given the class five minutes and more time if people were still trying to finish up. I feel like we lost out on a lot of material because those quizzes ran a little to long.

He was definitely passionate about the subject and enjoyed answering questions even if they strayed off topic. He was great at guiding the conversation back to the subject matter and always had interesting slides and stories.

Professor Curtis was a great teacher and his teaching style was easy for students to understand.

Perhaps, use the projector to write down lecture notes instead of using the whiteboard because it is very difficult to see especially for the students that sit in the back with objects blocking their view.

Matthew is one of my favourite teachers in UC Davis. He is a very nice person and always helpful during his office hour. He is always patient whenever students ask questions. The responding for the emails is quick. The tests are fair. I like this professor anyway.
